Who Is JouBeh?

• Iridium VAR – Top 15 Data Provider
• Over 1100 clients in 35 countries
• Dedicated to environmental data collection
• Solid Reputation for reliable customer service
• Canada’s Largest Service Provider for VMS
• Located in Nova Scotia - Canada
Why Iridium?

- **NO** Data Latency – Real Time
- **LOW COST** Hardware and Data
- **GLOBAL** Coverage (66 Satellites)
- **GLOBAL** Bi-Directional Communication
System Capacity

- 66 Satellites in LEO orbit in 6 planes
- Satellite footprint has a 4,480 km diameter
- Each satellite has 48 spot beams
- Each spot beam is 400 km diameter
- All spot beams overlap
- Each spot beam can handle 230 simultaneous calls
- Each satellite can process 1100 simultaneous calls

Spot beam pattern of an Iridium satellite
Provide Iridium Modems, Antennas, engineering support and custom accessories

Provide Iridium Data Services
- Short Burst Data
- Circuit Switched Data
- RUDICS
  - Consultation
  - Activations
  - Billing
  - Account Management

Provide Web Services and Data Processing
- GTS
- Google Earth Mapping
- Decoding
- Text Data Display
- FTP
- Storage
- Watch Circles and complex polynomial alarms
- Text forward to Iridium Handset
- Two way control of platforms
- Secure

SBD Cost Example
SVP-B (Plan B)

- GPS and sensor sample every hour Tx
- 17 byte message
- 17 bytes X 24 hours = 408 bytes per day
- 408 bytes X 30 days = 12,240 bytes per month
- Using Plan B subtract 12,000 free bytes per month
- 240 bytes X $1.40/KB = $0.33
- $16.00/mo. subscription + $0.33 = $16.33/month
- Web Services processing = $26.33/month
- Enhanced (includes GTS & FTP) = $36.33

LOW COST SOLUTION

Prices shown are in U.S. Dollars

DBCP XXVI 2010
Iridium Update
• 9602 SBD Modem – JouBeh is *Iridium’s principal partner* for OEM sales

**Key Features**
- Single Board Transceiver
- Small form factor
- Rated to -40C
- Aluminum alloy casework with Alodine 2600 coating
- GPS RF Pass-through technology
- Low cost

• Total billable subscribers grew 16.8% in 2nd Quarter 2010, reaching approximately 383,000 – up from approximately 328,000 at the end of the comparable quarter last year.
One week plot of SBD Session, Voice Call, & OpenPort Session Origination Points week of 5/23/10-5/29/10
(Commercial Traffic Only)
Iridium NEXT Receives 1.8 Billion Credit Facility

"This represents another important milestone for Iridium, and we are extremely pleased with the interest in our facility and corresponding support for Iridium. The development of Iridium NEXT is in full swing with our prime contractor, Thales Alenia Space, and we're on target to launch the first Iridium NEXT satellites in early 2015."  Matt Desch, CEO, Iridium Communication Inc., June 2010
Paul Hill, Jim Abraham (Director General of Weather and Environmental Monitoring - Environment Canada) and Mac Macleod sign three year data sharing agreement at the Canadian Meteorological & Oceanographic Society meeting, June 2010 Ottawa
